Undergraduate looking to use data analytics and software engineering to empower business

EDUCATION

Georgia Institute of Technology

Graduation: Dec 2020

B.S in Computer Science. Minor in Economics

GPA: 4.00

Certifications: Udacity Data Science Analyst Nanodegree Program, Coursera Deep Learning Specialization, Udemy Apache Spark with Java, Udacity Developing Android Apps, Udemy AWS Machine Learning with Python

Achievements: 1st at Citadel DataOpen at Georgia Tech, Vanderbilt Hackathon Most Disruptive Hack and Best Financial Hack, International Student Science Fair representative, National Merit Finalist

WORK EXPERIENCE

WorldQuant

Research Consultant

July 2018 – Present

Working Remotely

BazaarVoice

Data Science Intern

May 2018 – Present

Austin, TX

- Automated 22% of all image moderation by detecting copyrighted images with two convolutional neural networks in python
- Debugged an ETL script called daily to transfer machine learning model outputs from Raven to AWS S3
- Created a cross company data science group page to discuss new trends, models, and initiatives within BazaarVoice

The Home Depot Search Components Team

January 2018 – Present

Software Engineering Intern

Atlanta, GA

- Empowered Home Depot to improve autocomplete predictions objectively by creating a metric to assess quality and relevancy
- Removed bias from current metrics by using Word2Vec and a RNN for term diversity evaluation instead of Home Depot data
- Provided insight into the autocomplete system by analyzing the impact of recommended term diversity on autocomplete usage

Northwestern University

June 2015 – June 2016

Research Intern

Evanston, IL

- Created models to optimize data speeds by designing bandwidth allocation schemes in a network of femto and macrocells
- Analyzed informational cascades with 2 more nuances than mathematical models by using a markov chain and first step analysis
- Shared work by presenting the Markov chain model at the 700+ person Informational Theory and Applications conference

PERSONAL PROJECTS

Citadel Data Open

February 2018

- Won \$20,000 at a Citadel hosted data open along with a team of 3
- Analyzed city data to optimally place public service buildings in 6 cities across America using heatmaps and a random forest

WeLocate—Vandy Hacks (Most Disruptive Hack by RedVentures / Best Financial Hack by Capital One)

October 2017

- Developed a web app for small business owners to capture relevant data and use machine learning to find startup locations
- Created the machine learning model on AWS and used python scripts for data collection across multiple open APIs

Pokémon Go—Swarm Algorithm

June 2016 – August 2016

- Created a heuristic swarm algorithm to find a Euclidean circuit across my local park to optimize Pokémon Go loot
- Tested algorithm on distance weighted graph of a local park and improved efficiency from 18 to 21 stops in 30 minutes

Home Depot Convolutional Neural Network

November 2017

- Created a convolutional neural network in Tensor Flow and Python to categorically sort product images
- Sorted images of chandeliers, windows, lamps and similarly related items with 91% accuracy

LEADERSHIP

FRC Robotics

September 2015 – Present

CAD Head, Captain, Adult Mentor

- Led a 55+ member team, organized sessions, managed finances and mechanically supervised for over 500 documented hours
- Increased retention rate by over 200%, increased population from 20 to over 55 members, more than doubled total man hours

Computational Finance Club @ Georgia Tech

November 2017 – Present

Undergraduate Head, Treasurer

- Handled club account with student government, organizes budgets, and maintains ledger of voting membership
- Created undergraduate awareness of the club by hosting joint master and undergraduate computational contests

Automated Algorithms Design – Vertically Integrated Project

January 2018 – Present

- Designed machine learning, genetic, and evolutionary algorithms to outperform optimization methods and existing algorithms
- Predicted the effect of news headlines on stock prices using EMADE genetic programming and bag of words NLP algorithms

SKILLS

Languages: JAVA, Python, C#, SQL, C++, R, HTML/CSS, Spark, MATLAB

Frameworks/Tools: Keras, Android Studio, TensorFlow, GIT, AWS ML Studio, Tableau, LaTeX, Maven, Jupyter Notebooks, Bootstrap
