Undergraduate looking to use data science and software engineering to empower business

EDUCATION

Georgia Institute of Technology

B.S in Computer Science (Intelligence & Theory Concentrations) | Minor in Economics

GPA: 4.00

Graduation: Dec 2020

Certifications: Coursera Deep Learning Specialization, Udacity Data Analyst Nanodegree Program

Achievements: 1st at Citadel DataOpen at Georgia Tech, Vanderbilt Hackathon Most Disruptive Hack and Best Financial Hack, International Student Science Fair representative, National Merit Finalist

WORK EXPERIENCE

WorldQuant August 2018 - Present

Research Consultant | Virtual Research Center

Working Remotely

BazaarVoice

May 2018 - Aug 2018

Data Science Intern | Content Integrity Team

Austin, TX

- Automated 17.6% of all image moderation saving over \$65,000 per year by detecting copyright with 2 machine learning models Discovered drawbacks to photo quality rating by humans and created an alternate model with 74% accuracy on AWS SageMaker
- Debugged an ETL script called daily to transfer machine learning model outputs from data source to Amazon Web Services

The Home Depot

January 2018 - Present

Software Engineering Intern | Search Components Team

Atlanta, GA

- Empowered Home Depot to objectively improve autocomplete predictions by creating a metric to assess quality and relevancy
- Removed bias from current metrics by using Word2Vec and a RNN for term diversity evaluation instead of Home Depot data
- Provided insight into the autocomplete system by analyzing the impact of recommended term diversity on autocomplete usage

Northwestern University

June 2015 - June 2016

Research Intern | Under Dr. Randall Berry

Evanston, IL

- Created models able to increase data speeds by designing bandwidth allocation schemes in a network of femto and macrocells
- Analyzed informational cascades with 2 more nuances than mathematical models by using a markov chain and first step analysis
- Shared work by presenting the Markov chain model at the 700+ person Informational Theory and Applications conference

PERSONAL PROJECTS

VeriResume June 2018 - Present

- Developing an online platform to add applicant driven verification to resumes via document upload and manager feedback
- Marketed product using website (veriresume.co) to drive newsletter and gain feedback from recruiters

Citadel Data Open

February 2018

- Won \$20,000 at a Citadel hosted data open along with a team of 3
- Analyzed city data to optimally place public service buildings in 6 cities across America using heatmaps and a random forest

WeLocate—Vandy Hacks (*Most Disruptive Hack* by RedVentures / *Best Financial Hack* by Capital One)

- Developed a web app for small business owners to capture relevant data and use machine learning to find startup locations
- Created the machine learning model on AWS and used python scripts for data collection across multiple open APIs

Pokémon Go—Swarm Algorithm

June 2016 - August 2016

- Designed a heuristic swarm algorithm to find a Euclidean circuit across my local park to optimize Pokémon Go loot
- Tested algorithm on distance weighted graph of a local park and improved efficiency from 18 to 21 stops in 30 minutes

LEADERSHIP

FRC Robotics

September 2015 - May 2018

CAD Head, Captain, Adult Mentor

- Led a 55+ member team, organized sessions, managed finances and mechanically supervised for over 500 documented hours
- Increased retention rate by over 200%, increased population from 20 to over 55 members, more than doubled total man hours

Computational Finance Club @ Georgia Tech

November 2017 - Present

Treasurer, Undergraduate Head

- Handled club account with student government, organized budgets, and maintained ledger of voting membership
- Created undergraduate awareness of the club and initiative by hosting joint master and undergraduate computational contests

Automated Algorithms Design – Vertically Integrated Project

January 2018 - Present

- Designed machine learning, genetic, and evolutionary algorithms to outperform optimization methods and existing algorithms
- Predicted the effect of news headlines on stock prices using EMADE genetic programming and bag of words NLP algorithms

SKILLS

Languages: Python, JAVA, C#, SQL, R, HTML/CSS, Spark, Javascript, MATLAB

Frameworks/Tools: Keras, Android Studio, TensorFlow, GIT, AWS ML Studio, Tableau, LaTeX, Maven, Jupyter Notebooks, Bootstrap
