ROHIT MITTAPALLI

rmittapalli3@gatech.edu | rohitmittapalli.com | github.com/Rohit42 | 630-777-4728 | US Citizen

EDUCATION

Georgia Institute of Technology   **Graduation: May 2021**
B.S. in Computer Science (Intelligence & Theory) | Minor in Economics   *GPA: 4.00 / 4.00*
Certifications: Udacity C++ Nanodegree*, Coursera Deep Learning Specialization, Udacity Data Analyst Nanodegree Program
Awards: 1st at Citadel DataOpen at Georgia Tech, Vanderbilt Hackathon Most Disruptive Hack and Best Financial Hack
Coursework: Robotics and Perception, Intro to Artificial Intelligence, Computer Organization & Programming, Data Structures & Algorithms

EXPERIENCE

Uber   **September 2019 – December 2019**
Software Engineering Intern | Search   Palo Alto, CA

Microsoft   **May 2019 – August 2019**
Software Engineering Intern |PowerAI   *Seattle, WA*
- Built an expandable ML pipeline to visualize performance of feature engineering and selection methods against 8 datasets and 3 models
- Designed a genetic algorithm for feature selection achieving comparable and more consistent performance than current selection methods
- Converted current data quality checks for AI Builder to a metadata driven approach allowing each model to have unique validations

BazaarVoice   **May 2018 – Aug 2018**
Data Science Intern | Content Integrity and Insights Team   *Austin, TX*
- Automated 17.6% of all image moderation saving over $65,000 per year by detecting copyright with 2 machine learning models
- Discovered drawbacks to photo quality rating by humans and created an alternate model with 74% accuracy on AWS SageMaker
- Debugged an ETL script called daily to transfer machine learning model outputs from data source to Amazon Web Services

The Home Depot   **Jan 2018 – May 2018**
Software Engineering Intern | Search Components Team   *Atlanta, GA*
- Provided insight into the autocomplete system by analyzing the impact of recommended term diversity on autocomplete usage
- Removed bias from current metrics by using Word2Vec and an RNN for term diversity evaluation instead of Home Depot data

Northwestern University   **June 2015 – June 2016**
Research Intern | Dr. Randall Berry   *Evanston, IL*
- Created models able to increase data speeds by designing bandwidth allocation schemes in a network of femto and macrocells
- Analyzed informational cascades with 2 more nuances than mathematical models by using a Markov chain and first step analysis
- Shared work by presenting the Markov chain model at the 700+ person Informational Theory and Applications conference

PERSONAL PROJECTS

VeriResume   **June 2018 – Present**
- Developed an applicant-driven resume verification platform (demo.veriresume.co) using React.js, Express, MongoDB and AWS services
- Marketed product using website (veriresume.co) to drive newsletter and gain feedback from recruiters

Stock Simulator *(stocksim.rohitmittapalli.com)*   **October 2018**
- Developed a 20-minute stock trading game for 12 teams of 4 using React.js and Firestore to teach basic stock trading to fraternity
- Generated artificial news events and corresponding stock prices using a random bounded walk and a real-world beta volatility

Citadel Data Open   **February 2018**
- Won $20,000 at a Citadel hosted data open along with a team of 3
- Analyzed city data to optimally place public service buildings in 6 cities across America using heatmaps and a random forest

WeLocate—Vandy Hacks *(Most Disruptive Hack by RedVentures / Best Financial Hack by Capital One)*   **October 2017**
- Developed a web app for small business owners to capture relevant data and use machine learning to find startup locations
- Created the machine learning model on AWS and used python scripts for data collection across multiple open APIs

Pokémon Go Swarm Algorithm   **August 2017**
- Designed a heuristic swarm algorithm to find a Euclidean circuit across my local park to optimize Pokémon Go loot using C++
- Tested algorithm on distance weighted graph of a local park and improved efficiency from 18 to 21 nodes in 30 minutes

ACTIVITIES

Alpha Kappa Psi – Professional Business Fraternity   **Jan 2018 – Present**
Vice President of Finance
- Managed a stock portfolio of $15,000+ along with 3 other directors, receiving and filtering input from the 85+ brother fraternity
- Hosted personal finance workshops and stock simulations to teach investment strategies and educate them in other related subjects

Computational Finance Club @ Georgia Tech   **Nov 2017 – Present**
Undergraduate Head | Treasurer
- Handled club account with student government, hosted industry professionals, maintained membership, and organized budgets
- Created undergraduate awareness of the club and initiative by hosting joint master and undergraduate computational contests

SKILLS

Languages: Python, C++, JAVA, C#, SQL, R, HTML/CSS, Spark, Javascript, MATLAB
Frameworks: React.js, MongoDB, Keras, Firebase, Android Studio, TensorFlow, AWS ML Studio, Tableau
