Undergraduate looking to use data science and software engineering to empower business

EDUCATION

Georgia Institute of Technology   **Graduation:** Dec 2020
B.S in Computer Science. Minor in Economics   **GPA**: 4.00
Certifications: Coursera Deep Learning Specialization, Udacity Data Analyst Nanodegree Program
Achievements: 1st at Citadel DataOpen at Georgia Tech, Vanderbilt Hackathon Most Disruptive Hack and Best Financial Hack, International Student Science Fair representative, National Merit Finalist

WORK EXPERIENCE

WorldQuant   **August 2018 – Present**
Research Consultant | Virtual Research Center   *Working Remotely*

BazaarVoice   **May 2018 – Aug 2018**
Data Science Intern | Content Integrity   *Austin, TX*
- Automated 17.6% of all image moderation saving over $65,000 per year by detecting copyright with 2 machine learning models
- Discovered drawbacks to photo quality rating by humans and created an alternate model with 74% accuracy on AWS SageMaker
- Debugged an ETL script called daily to transfer machine learning model outputs from data source to Amazon Web Services

The Home Depot   **January 2018 – Present**
Software Engineering Intern | Search Components Team   *Atlanta, GA*
- Empowered Home Depot to objectively improve autocomplete predictions by creating a metric to assess quality and relevancy
- Removed bias from current metrics by using Word2Vec and a RNN for term diversity evaluation instead of Home Depot data
- Provided insight into the autocomplete system by analyzing the impact of recommended term diversity on autocomplete usage

Northwestern University   **June 2015 – June 2016**
Research Intern | Under Dr. Randall Berry   *Evanston, IL*
- Created models able to increase data speeds by designing bandwidth allocation schemes in a network of femto and macrocells
- Analyzed informational cascades with 2 more nuances than mathematical models by using a markov chain and first step analysis
- Shared work by presenting the Markov chain model at the 700+ person Informational Theory and Applications conference

PERSONAL PROJECTS

VeriResume   **June 2018 - Present**
- Developing an online platform to add applicant driven verification to resumes via document upload and manager feedback
- Marketed product using website (veriresume.co) to drive newsletter and gain feedback from recruiters

Citadel Data Open   **February 2018**
- Won $20,000 at a Citadel hosted data open along with a team of 3
- Analyzed city data to optimally place public service buildings in 6 cities across America using heatmaps and a random forest

WeLocate—Vandy Hacks (*Most Disruptive Hack* by RedVentures / *Best Financial Hack* by Capital One**)**   **October 2017**
- Developed a web app for small business owners to capture relevant data and use machine learning to find startup locations
- Created the machine learning model on AWS and used python scripts for data collection across multiple open APIs

Pokémon Go—Swarm Algorithm   **June 2016 – August 2016**
- Designed a heuristic swarm algorithm to find a Euclidean circuit across my local park to optimize Pokémon Go loot
- Tested algorithm on distance weighted graph of a local park and improved efficiency from 18 to 21 stops in 30 minutes

LEADERSHIP

FRC Robotics   **September 2015 – May 2018**
CAD Head, Captain, Adult Mentor
- Led a 55+ member team, organized sessions, managed finances and mechanically supervised for over 500 documented hours
- Increased retention rate by over 200%, increased population from 20 to over 55 members, more than doubled total man hours

Computational Finance Club @ Georgia Tech   **November 2017 – Present**
Treasurer, Undergraduate Head
- Handled club account with student government, organized budgets, and maintained ledger of voting membership
- Created undergraduate awareness of the club and initiative by hosting joint master and undergraduate computational contests

Automated Algorithms Design – Vertically Integrated Project   **January 2018 – Present**
- Designed machine learning, genetic, and evolutionary algorithms to outperform optimization methods and existing algorithms
- Predicted the effect of news headlines on stock prices using EMADE genetic programming and bag of words NLP algorithms

SKILLS

Languages: Python, JAVA, C#, SQL, R, HTML/CSS, Spark, Javascript, MATLAB
Frameworks/Tools: Keras, Android Studio, TensorFlow, GIT, AWS ML Studio, Tableau, LaTeX, Maven, Jupyter Notebooks, Bootstrap
